

FIG. 6 of the Design Application is renumbered to be FIG. 4 in the Continuation Application.

REMARKS

This Preliminary Amendment is being filed with a Request for Filing a Continuation Application Under 37 C.F.R. 1.53(b) of prior Design Patent Application 29/198,215.

The Continuation Application is a Utility Nonprovisional Patent Application and Applicant has included a new Specification in accordance with 37 C.F.R. 1.53(b) and 35 U.S.C. 111(a), and no new matter has been introduced.

The drawings (FIGS. 1-5) are the same as in the prior design application except two of the Design Application drawings have been deleted because they presented the same images of other drawings which are unnecessary in a Utility Application. Only reference numbers are added to the original drawings in the new Specification and some figure numbers were interchanged. The following provides a cross-reference for relating the Design Application drawings and the Utility Continuation Application drawings:
